

**2025 Plant Pricing Guide**  
**For annuals and perennials**

This guide was created to help members who are pricing their own plants at home.

It is our hope that using this guide will result in more uniform prices for our shoppers: same plant, same size pot, same price (more or less).

Treat these as guidelines – it's ok to price your plants differently whenever you feel it's warranted.

| Plant type<br><i>(see below)</i> | Pot Size                       |                                  |  |
|----------------------------------|--------------------------------|----------------------------------|--|
|                                  | Small<br>9-11 cm<br>3-4 inches | Medium<br>12-17 cm<br>5-6 inches | Large 1 gallon<br>18-20 cm<br>7-8 inches |
| Common Plant                     | \$6                            | \$8                              | \$10                                     |
| Nice Plant                       | \$10                           | \$12                             | \$17                                     |
| Special Plant                    | \$14                           | \$17                             | \$20 +                                   |
| Mother's Day Table               | Maximum \$20                   |                                  |  |

| Examples of Plant Types |                                |                             |
|-------------------------|--------------------------------|-----------------------------|
| Common                  | Nice                           | Special                     |
| Annuals                 | Black Mondo Grass              | Peonies                     |
| Veggies/Herbs           | Japanese Forest Grass          | Roses                       |
| Daylilies               | Heucheras                      | Hellebores                  |
| Irises                  | Astrantias                     | Podophyllum                 |
| Alliums                 | Epimedium                      | Trillium                    |
| Geraniums               | Hostas with interesting leaves | Arisaema                    |
|                         |                                | Rare varieties or cultivars |
